

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

REPORT.

To the Legislature of the State of New-York:

The Trustees of the State Library respectfully

REPORT:

That additions have been made to the same, both in its Law and Miscellaneous Departments, to the full extent of the means granted by your predecessors.

That the donations received during the last year, principally through the agency of M. Vattemare, have been highly interesting and valuable.

By his majesty the King of the Netherlands, there has been presented a copy of the magnificent work on the empire of Japan, now in progress of publication, under his auspices. When completed, it will consist of some twenty or thirty folio volumes, which, unfortunately at present being incomplete, have to remain unbound. Still two volumes are finished and placed in the Library, (one on the botany of Japan, and one on its reptiles,) which will give some idea of the extent and value of the work. The remainder fills a large box.

The various ministers of the government of the Netherlands have also contributed copies of the official reports emanating from their different departments, and we have thus become in possession of the statistics of commerce, education, public charities and crime, for a series of years. A work of great interest, by Leemans, on the Monuments of Egyptian Antiquity, in the Museum at Leyden, is presented by the minister of the colonies, and to his donations and that of his colleagues in the Offices of Foreign Affairs and the Marine, we are further indebted for a valuable collection of charts and maps.

From the government of the kingdom of Belgium a very complete series of publications on the statistics of that country have been also obtained by donation. The administration of justice, the system of education throughout its whole course, the formation and progress of railroads, the improvement of the sanitary condition of the people, and the history of various beneficent establishments, form only a part of the subjects considered in these liberal benefactions.

From the government of France (liberal through all its changes) there have been received, in the first place, seventy-three volumes, which, with those already in the library, make a complete series of reports on the condition of the whole eighty-six departments constituting the empire. To these must be added publications issued by the various ministers of state, in continuation of their former donations, and keeping up the series of French statistics. Several volumes have been added to the great collection of "*Documents Inédits*" of the History of France. Fifteen sheets of the great map of France, with appropriate descriptions, are also received, additional to those already in our possession.

The magnitude of the donations from France, from its various ministers of government, cities, societies and individuals, can alone be appreciated by a careful examination of the list of presents accompanying this report.

From the University of Gottingen there has been received, through the Hanoverian Consul General at New-York, a series of the Laws and Ordinances of Hanover, in 34 vols. 4to., besides several works on the botany of that kingdom, and a most beautiful topographical chart in seventy-seven quarto plates.

The government of Bavaria, through its Consul (C. F. Hagedorn) at Philadelphia, continues its donations, and has this year presented several volumes on the statistics of that kingdom.

From the Royal Court and State Library at Munich a continuation of the various periodicals previously forwarded has been received.

The Royal Library of Berlin has sent through Dr. Pertz, its chief librarian, a collection of works, relating principally to the

history and languages of the East, and to antiquities generally, with catalogues of that great collection of books.

Donations have also been received from the following European societies, and the trustees must refer for particulars to the catalogue of donations: the Royal Academy of Sciences at Amsterdam, the Royal Academy of Sciences and Belles Lettres of Belgium, the Society for Intellectual Emancipation at Brussels, the Society of Agriculture of France, the Geological Society of France, the National Institute, the Geographical Society of France, the Helvetic Society of Natural Sciences, and the Royal Society of Northern Antiquaries at Copenhagen.

Among individuals should be particularly named Prince Charles Bonaparte, who has sent a copy of his beautiful work on the Natural History of Italy, in three folio volumes, in exchange for a copy of the "Natural History of New-York;" M. Van Der Maelen, Director of the Geographical Establishment at Brussels, who has presented a number of valuable maps, and Prof. Milne Edwards of Paris.

The Provincial Parliament of Canada is liberal and constant in its interchange of public documents.

On turning to our country, we have to acknowledge donations from the United States Government, from twenty-five States and one territory, from the Common Council of the City of New-York, from various scientific, historical and literary societies, and from individuals throughout the Union. Of these last, especial thanks are due to Mr. James Lenox, of New-York, for his valuable donation of volumes relating to the early history of this country.

From the rapid increase of the library for several years past, as is shown by the various annual reports, the money appropriated for binding has been found insufficient to meet the necessary wants, and although a moderate additional sum was received last year, there are still several large boxes, the contents of which have at present to remain unbound.

The appropriation for the present year has also not been made in advance, as has been the case for some years past. This is a

serious inconvenience, particularly as sales by auction of the most valuable works are constantly occurring during the winter. The Trustees respectfully represent the propriety of making an appropriation for two years, each to be used during its year.

In this connection, it should also be mentioned, that the Library has, for the four last years, not obtained the appropriation formerly granted to it from the chancery fund. This would now amount to \$1,200, (having been \$300 per annum) and if on hand, would enable the Trustees to make many valuable purchases. The number of publications issued in the United States alone, and which are said to have doubled within the last four or five years, is, in itself, an argument in favor of an increase in the annual appropriation.

Catalogues have been prepared, as usual, of the books added to the Library in the Law and Miscellaneous departments, and also of the Bleeker Library, so liberally deposited. Probably, in strict accordance to law, all of these should be sent in for publication, but the Trustees only submit the catalogue of law books obtained, and the list of donations.

One of the principal reasons for this omission is, that the laws of the State have recognized the necessity of printing a general catalogue every five years, and this period will elapse in 1855. It is therefore very desirable that some provision should be made this year for at least commencing the catalogue. With the transfer of the Library to the new building, there seems to be a necessity for a full descriptive list of its contents at that time.

There is, however, further added to the papers forwarded, a catalogue of the coins and medals in the State Library, and for the proper placing of which, in the new building, arrangements are already completed. This collection (1,100 in number) consists mainly of the very liberal donation of the Hon. John Greig, of Judge Johnson and others. A complete descriptive catalogue of all of these has been kindly made by Richard W. Davids, Esq., of Philadelphia, who deserves, and has received, the thanks of the Trustees for the same.

Appended to this report, is an account current of the receipts and expenditures during 1853.

By order of the Regents of the University, ex officio Trustees of the State Library.

G. Y. LANSING, *Chancellor.*

T. ROMEYN BECK, *Sec'y.*

* A curious fact is related concerning the pennies of William IV., which have now become very scarce. The copper of which these coins were made, was discovered to contain a portion of gold, so that each penny was intrinsically worth three half pence. In accordance with those laws of human action which seem as universal and immutable as those of chemical agency, the whole issue shortly found its way to the melting pot.—[Chambers' Journal, March 25, 1864.]

VERSE : The Bust of the Holy Apostles, with nimbus. **LEGEND :**
Romæ parentes arbitrique gentium.

This medal was coined in honor of the ceremony of taking possession of the cathedral church. This medal was struck by order of the Pope, for the Holy Guild of St. Joseph at Edinburgh, on the occasion of the arrival of two members of the Guild, charged with the honor of paying its respects to the Pope. "*In laboribus,*" etc. is the motto of the Brotherhood of St. Joseph, instituted for the religious, moral, and physical improvement of the working classes.

REPORT.

To the Legislature of the State of New-York:

The Trustees of the State Library respectfully

REPORT :

That the additions made to the respective libraries have, during the last year, been limited in their extent, owing to the want of an appropriation for the greater part of the time included in the same.

Great care has, however, been taken to procure all American law books, and indeed to purchase all works of immediate interest, so far as the funds on hand would permit.

The donations to the library continue to be numerous and valuable.

From the Emperor of France the library has received a series of bronze medals, struck at the government mint, of the monarchs of France, from Pharamond to Louis Philippe, seventy-four in number. A splendidly illustrated work on the topography and local history of the ancient province of Languedoc in that country, containing no less than 584 engravings, has been obtained from the same source.

M. Vattemare has been the medium of their transmission, and through him have also been received large and valuable donations from the ministers of the French empire, among which may be specified the Travels in Persia, by M.M. Flandin and Coste, in folio, very profusely illustrated; the Bulletin of the Laws of France (in regular continuation), the Annals of Bridges and Highways (the same), with other various statistical works. Through him also have been obtained exchanges from the Impe-

REPORT.

To the Legislature of the State of New-York:

The Trustees of the State Library, respectfully

REPORT:

That during the last year, the arrangement of the collections belonging to the Library, in the new library building, has been fully completed, under the personal supervision of the Library committee of the Trustees.

The additions to the Library during the year, from purchases and donations, amount to about 3,000 volumes.

The usual annual allowance for the binding of books has, for many years, been \$800. This, for some time past, has been found to be insufficient, and the deficiency has been met by extra appropriations.

It is quite evident from the experience of several years, that the present amount is too small, and the Trustees recommend its increase to \$1,250.

In 1853, the Legislature authorised the purchase of the correspondence and other papers of George Clinton, the first Governor of this State, then on deposit in the office of the Secretary of State, and appropriated the sum of \$500 for arranging, indexing, binding and lettering the same. The labor of indexing and arranging these manuscripts, was entrusted principally to Orville L. Holley, Esq., by whom the work has been very judiciously

and thoroughly performed, under the direction of the Library committee.

The collection numbering twenty-three volumes of folio size, very substantially bound and appropriately lettered, has been placed in the Library, and with the celebrated Andre papers forming part of the collection, which, for their better preservation and more ready examination, have been framed and covered with glass, form an interesting addition to its contents. The expenses attendant upon this matter have exceeded the appropriation by the sum of \$96, the payment of which is respectfully recommended.

From the extent of the Library and the convenience of its arrangements, it is now beginning to be, what it is hoped it will hereafter be, to a much greater extent, the resort of persons who are engaged in literary, scientific, and statistical investigations.

It needs, however, large additions in many of its departments, if it is to keep up with the spirit of inquiry, and the advance in learning, which mark the present age. The Trustees therefore renew the recommendation heretofore made by them, that the annual appropriation for its enlargement be increased to such an extent, as in the enlightened liberality and judgment of the Legislature, may be justified by the ability of the State, and the importance of the object. If many of the smaller monarchies of Continental Europe are willing, for the benefit of their subjects, to accumulate stores of learning in their public libraries, to which our collection, considerable as it has become, is comparatively trifling, how much more readily and thoroughly should the government of a free State, the largest in its population and the greatest in its resources of any republic in existence, provide for the wants and instruction of its citizens.

In obedience to a statutory provision, and also in pursuance of a resolution of the Assembly of last year, a catalogue of the library is now in the course of publication, which will be completed in a few months. It will probably be desirable, from its size, to divide it into two volumes; the one containing the catalogue of

the Law Library, and the other that of the General or Miscellaneous Library. It has therefore been considered unnecessary to communicate to the Legislature a list of books purchased during the year.

The donations to the Library under the system of exchanges with foreign governments and the other States of the Union, as well as those from societies and from individuals, have continued during the past year as usual. A statement of them is hereto annexed. It will be seen from this that the donations from France, Holland and Sweden, forwarded through the agency of M. Vattemare, have been the largest of those from foreign governments.

Accounts, properly classified, showing the manner in which the funds received by the Trustees during the past year have been expended, are hereto annexed.

In the death of Theodoric Romeyn Beck, late Secretary of the Trustees, to which event the Regents have referred in their annual report, the Library especially has sustained a severe loss. Its interests and its enlargement were the subject of his constant thought, and of his unremitting energies. His knowledge of books, greater, it is believed, than that of almost any person in our State, combined with his varied literary acquirements, his good judgment and his prudent management, have done very much for the rapid, and at the same time systematic increase of the Library.

In remembrance of his long continued and meritorious labors in its behalf, and as an evidence of regard for his character and attainments, the Trustees propose, with the sanction of the Legislature, to place in the Library building a suitable memorial to his memory.

The duties of the Secretary of the Regents have become so numerous and important, that the Regents have resolved to appoint an additional Secretary, whose chief duty they propose it shall be to take charge of the Library, and of the system of State and

international exchanges, and they respectfully request the Legislature to make such provision for his compensation as they may deem proper.

By order of the Regents of the University, *ex-officio* Trustees of the State Library.

G. Y. LANSING, *Chancellor*.

S. B. WOOLWORTH, *Secretary*.

**The Secretary of the Regents, *ex-officio* Treasurer of the
Library Fund, in account current.**

REPORT.

To the Legislature :

The Trustees of the State Library, respectfully

REPORT :

That during the last year the additions to the Library have amounted to about 3,000 volumes.

The annual appropriation for its increase has been expended with great care in purchases, and large additions have been made by donations and exchange. The number of donors in our own State has largely increased, exhibiting the increasing interest of our citizens in its great public library, and an earnest desire to add to its value. The works relating to the history of the State and published under its direction, have brought many valuable returns to the Library from various parts of our own country and from Europe.

The system of international exchange has been continued through the agency of M. Vattemare. The accessions thus made will fully appear in the statements annexed to this report. The most valuable are from France, the Netherlands and Prussia. Among them, as worthy of special notice, may be named the descriptions of inventions and patents in France for five years from 1850, in twenty-one volumes 4to; the works of Rembrandt in photograph, in eleven port folios; annals of the foreign commerce of France, from 1843, to 1856., a continuation of the contributions of the ministers of France; several beautiful vols. of the works of Frederic the Great, from Prussia, and the journals and secret resolutions of the States General of Holland and West Friesland, in 225 vols. 4to. These last are expected to throw

important light on the history of this State while under the Dutch government.

Letters recently received from Mr. J. V. L. Pruyn, now in Europe, advise the Trustees that the Great Seal Patent Office of Great Britain has granted his application, on behalf of the State of New-York, of a copy of the great work on patents, now being published by the British Government, and of which but 250 copies are printed. This publication is comprised in two series. Of the old series, or patents granted prior to 1852, there are 14,300 specifications, which will fill not less than 200 folio and 200 quarto volumes. In the new series, extending from 1852 to 1856, there are about 13,000 specifications, which will fill about 170 folio, and the same number of quarto volumes. The whole work, therefore, will be completed in about 740 folio and quarto volumes, the cost of which (a single set) is not less than \$25,000. It is given with the understanding that it will be properly bound, and to that effect it is hoped that the Legislature will make a suitable provision. About \$4,000 will be required to bind it in a manner approved by Mr. Woodcraft, one of the English Commissioners of patent.

The experience of several years has proved the annual appropriation of \$800 for binding, quite inadequate to the demands of the Library. Many of the accessions are in sheets, or bound in too light and fragile a form for a public library, and it is found extremely inconvenient to permit accumulations of unbound volumes. The balance against the binding fund has annually increased until it now amounts to about \$800.

The catalogue of the Library which has been in a course of preparation for the last two years, is nearly completed. In the last report it was stated that it would be published in two volumes—the one containing the catalogue of the law Library, and the other of the general Library. These have been completed. It has been found necessary to add a third, to contain a catalogue of maps, manuscripts, coins, medals and engravings, and such other matters as could not be appropriately placed in the other volumes.

The Trustees cannot refrain from expressing their gratification at the manner in which this work has been executed. In the perfection of its plan, and the arrangement of its parts it will compare favorably with any similar work which has ever been published. It reflects great credit on the gentlemen of the library who have been engaged in its preparation; and the beauty of its typography, and the chaste neatness of its binding are a most pleasing evidence of the taste and skill of its enterprising publisher.

The progress and condition of the Library, as presented in this catalogue are most gratifying. The whole number of vols. is 43,634, and of these 20,360 vols. have been added since the publication of the former catalogue in 1850. And yet in many departments of science it is greatly deficient. Scholars who have visited it for the purpose of investigation, have called for works of standard authority which are not on its shelves.

Science in all its departments is advancing with a progress before unequalled. Literature is constantly increasing its contributions. The means which at a former day were ample are now insufficient. The Trustees again urge an enlargement of the appropriation for the increase of the Library to an extent commensurate with the demands of the object and the wealth of the State, assured that every provision made for the increase of intelligence and the promotion of knowledge, will constitute the most productive capital, and bring the richest returns.
